

TP CONTROL

Budget & forecasting

Cost management
Any time
Centrally

thinkproject

Everything you need, in one place, to make projects a success.

TRANSPARENT BUDGETING AND RESILIENT COST CONTROLLING ARE IMPORTANT CORE TASKS THAT ARE ESSENTIAL TO THE SUCCESS OF EVERY CONSTRUCTION PROJECT.

Reliability, precision and clarity are required - but all too often, this cannot be achieved using traditional tools like Excel tables and standalone solutions.

This is why many building owners, project controllers and project developers rely on TP CONTROL.

TP CONTROL brings together all of the key functions for comprehensive project controlling:

FORECASTING

BUDGETING

INVOICE APPROVAL

EVALUATION

Highlights

1 ACCESS FROM ANYWHERE AT ANY TIME

The days when Excel tables or PDF evaluations were sent around by email are over. With TP CONTROL, all costs are

managed centrally, making them simple to view for anyone with the corresponding rights – and ensuring absolute transparency.

2 TRANSPARENT COST STRUCTURES IN LARGE PROJECTS

All of the costs of the construction project are clearly displayed in TP CONTROL. All of the parties involved use the same model. This prevents deviations and

discrepancies and ensures complete cost transparency, however big the project may be.

3 REAL-TIME ANALYSIS

The functions included allow cost information to be seamlessly transferred to various processes. This enables project managers and

controllers to manage cash flow planning and billing runs, create cost forecasts and access critical evaluations immediately and without delay.

4 COMPREHENSIVE REPORTING FOR ALL

Thanks to its strong reporting function and flexible adaptability, TP CONTROL allows evaluations to be accessed with just a few clicks and turned into targeted

reports so that the status, progress and forecast for a project or an entire project portfolio can be presented to management and other project participants.

5 BRIDGE BETWEEN CORPORATE FINANCE AND PROJECT REALITY

TP CONTROL bridges the gap that often exists between the project itself and a company's accounting department.

It can even integrate accounting systems like SAP – all while ensuring high security standards.

6 AN ESTABLISHED PROVIDER AS A ONE STOP SHOP

As a long-standing SaaS provider for the construction industry, Thinkproject not only has the requisite expertise, but also offers Common Data Environments (virtual

project rooms) – making it a one-stop shop for solutions for project-oriented cost controlling, drawing and document management, and much more besides.

Features

BUDGET AND FORECASTING

Easy-to-use input screens for cost monitoring and cost planning by budget item and /or contract unit

Cost breakdowns based on individual project budgets

Detailed tracking of actual costs and the corresponding orders

Report generator with extensive evaluation options, forecasts and risk analyses

Risk management via management and assessment of financial risks (e.g. change order notifications, notices of concern or obstruction)

Transfers between budget items and evidence of transfer Forecasting functions and liquidity planning

Detailed rights concept for connecting the various user groups

Automatic generation of invoice cover letters, periodical management reports, content for programs like Email and Messenger, etc.

Interfaces with accounting systems (e.g. SAP, Navision)

DIGITAL INVOICE APPROVAL

Integration of external project participants

Overview of current processing status

Full-text search within invoices

Automatic interface with Budget & Forecasting – direct link to order and invoice screen

Process individually configurable for each project

Filtering and evaluations

CHANGES

Management of all "decision documents": variation management, change order management, as well as notices of concern or obstruction

Recording of change orders/decision documents in an online form, incl. monetary valuation of freely definable workflows

Digital stamp for documenting each approval step

MULTI-PROJECT REPORTING

Freely configurable web database incl. rights concept Fully customisable reporting tool for all construction projects, incl.:

- Schedule management
- Risk assessment
- Cost reports and cross-project evaluations

- Photo documentation
- Traffic light evaluations

About Thinkproject

Europe-based Thinkproject is a leading construction and engineering SaaS provider. Turning intelligence from data and industry experts into an advantage for customers, it is at the forefront of the digitalisation and transformation of the AECO industry.

With 450 employees worldwide, Thinkproject provides digital solutions enabling the management of asset lifecycles to:

2,750

CUSTOMERS AND MORE THAN

250,000

USERS, IN OVER

60

COUNTRIES
